Uncompromised image quality

Infinitely clear images. High quality AF and image stabilization bring out the intrinsic potential of the lens.

Our flagship ultra-wide-angle zoom is reborn

SP 15-30mm F/2.8 Di VC USD G2 (Model A041)
For Canon and Nikon mounts
Di: For full-frame and APS-C format DSLR cameras
A world of wonder awaits you
Ultra-optimized optics create yet another incredible image

The newly developed AX Coating enables clear images

A new AX (Anti-reflection eXpand) Coating developed by Tamron using specialized deposition technology has enabled a uniform coating to be applied to the convex surface of large curvatures lenses, thereby resolving the major difficulty of applying a uniform coating edge to edge on a strong convex surface. This AX Coating, coupled with a nanotechnology-based eBAND Coating, and BBAR Coating, thereby enabling unsurpassed curtailment of ghosting and consequently enabling superlative, exceptionally clear image edge to edge.

Additional Features

- **New Fluorine Coating for improved durability**
  
  The durability of the front element coating is greatly improved with the development of new Fluorine Coating. The lens surface is easier to wipe clean and is less vulnerable to the damaging effects of dirt, dust, moisture, and fingerprints. With this improved durability, your important lenses can now be safely protected on a long-term basis.

- **The rear filter holder enables greater creative flexibility**
  
  A filter holder that allows you to attach gelatin filters to the rear side of the lens is included as a standard feature (for Canon EF-mont only). You can now shoot with filters much more easily, traditionally rather difficult when shooting with ultra-wide-angle lenses with large front lens elements.

- **Moisture-Resistant Construction**
  
  For greater protection when shooting outdoors, leak-resistant seals throughout the lens barrel help protect your equipment.

- **TAMRON TAP-in Console™**
  
  Optional compatibility with the Tamron’s TAP-in Console (Model TAP-01) lets you easily update firmware and customize the lens by making fine adjustments to AF focusing positions, and more.

**SP 15-30mm F/2.8 Di VC USD G2 (Model A041)**

- Model A041
- Focal Length: 15-30mm
- Max. Aperture: F/2.8
- Angle of View (diagonal): 110°32’-71°36’
- Optical Construction: 18 elements in 13 groups
- MOD: 0.28m (11 in.)
- Filter Size: 82mm
- Max. Diameter: 98.4mm
- Length*: 145mm (5.7 in.)
- Weight: 1,110g
- Aperture Blades: 9

- Min. Aperture: F/22
- Image Stabilization: 4.5 Stops (TELE/ WIDE)
- Performance: ICQA Standards Compliant

- Standard Accessories: Integrated flower-shaped hood, Lens case (push-on front)
- Compatible Mounts: Canon EF mount, Nikon

---

**Caution:** Please read the instruction manual carefully before using the lens.
