Get up close with these wide-angle, fixed focal lenses.

Small but mighty! Magnification ratio is 1:2.

NEW

20mm F/2.8 Di III OSD M1:2 (Model F050)

24mm F/2.8 Di III OSD M1:2 (Model F051)

35mm F/2.8 Di III OSD M1:2 (Model F053)
This fixed focal lens series offers more choices for creative expression.

Introducing three new models for Sony E-mount full-frame mirrorless cameras. In addition to fast F/2.8 apertures, all have enhanced close-focusing capability (1:2 reproduction ratio) and all are marvelously compact. Choose the ultra-wide 20mm F/2.8 Di III OSD M1:2 (Model F050) to stretch your imagination. Or the 24mm F/2.8 Di III OSD M1:2 (Model F051) to widen your horizons. And the must-have lens for everyday use is the 35mm F/2.8 Di III OSD M1:2 (Model F053). The close-focusing capability lets you capture scenes dynamically by leveraging the unique perspective. Enjoy many different types of photography including nature, tabletop and family snaps. All three lenses are light in weight and compact—so you can travel light or pack all three! For outstanding performance, each is constructed using special glass materials including LD (Low Dispersion) and GM (Glass Molded Aspherical) lens elements effectively arranged to quash aberrations. And Tamron’s legendary BBAR (Broad-Band Anti-Reflection) Coating successfully reduces ghosting and flare. Moreover, leveraging your camera body’s features* each delivers, throughout the frame, high resolution performance that maximizes the benefits of the latest high-megapixel cameras. You will experience an all-new mode of expression with these dynamic fixed focal wide-angle lenses.

*When shooting with the camera’s lens correction function enabled.

Extreme portability increases versatility and comfort

Designed to match light weight, full-frame mirrorless cameras. Overall length is just 64mm (2.5 in). They are comfortably portable, highly maneuverable and amazingly easy to use and compose. Because the overall length does not change when focusing, you can get as close to an object as you need to without fear of accidentally bumping the front element.

Tamron lenses for Sony E-mount cameras are functional, versatile and fun!

These are just three of the many Tamron lenses for Sony E-mount cameras. Throughout the lineup you’ll find creative tools that help you enjoy the world of mirrorless cameras and a broader range of photographic possibilities. Small and light weight, they are definitively portable and can easily be all carried together as a complete set. For convenience sake, all of the lenses in the series have the same 67mm filter diameter. You can share the use of a single polarizing (or other) filter and avoid the aggravation of searching through lens caps when changing lenses.

* Tamron’s lineups for Sony E-mount cameras with 67mm filter diameter
- High-speed standard zoom lens 28-75mm F/2.8 Di III RXD (Model A036)
- High-speed ultra wide-angle zoom lens 17-28mm F/2.8 Di III RXD (Model A046)

20mm F/2.8 Di III OSD M1:2
(Model F050)
